

QUALITY LABELS
**FOR THE
BREWERY
INDUSTRY**

LH Group

We offer innovative customized label and sleeving solutions with the extension of a fully staffed design team to help take your brand from the dressing room to the runway.

*If you don't have **GRAPHIC ARTIST**, we can connect you with creative art specialist who can assist you.*

When the creative streak strikes! Remember we offer variable printing and promotional designs all at once with the added convenience of individually numbering or coding your labels for the upcoming promotion.

Brewery LABELS

| METALIZED |

Metalized labels bring a touch of luxury with their metallic finish, making products stand out and convey a sense of quality and sophistication.

| SHRINK SLEEVES |

Shrink sleeves and tamper bands can be applied by hand or automatic machines, customized with full-color designs. They come in cut pieces for manual use and rolls for automated processes.

| WET STRENGTH |

Wet strength labels resist moisture, ensuring they stay intact and legible even in wet environments. Ideal for products that need refrigeration or exposure to water, these labels maintain their quality and durability.

| PRESSURE SENSITIVE LABELS |

Pressure-sensitive labels are easy to apply, requiring no additional adhesive or heat. They offer versatility and customization for various industries, making them a popular choice for branding and labeling needs.

| THERMOCHROMATIC INKS |

Thermochromatic inks change color with temperature fluctuations, offering a unique and engaging element to packaging and labels. These inks find applications in various industries, from food packaging to security features.

| WASH OFF LABELS |

Wash-off labels are designed to be easily removed from containers, leaving no residue. They are commonly used in recycling programs and for temporary labeling needs.

Colour **MANAGEMENT**

- Colour management is a set of tools and concept which try to preserve, the same colours from the artwork to the final use : printing or otherwise.
- Our colour management system consist of an X-Rite eXact Spectrophotometer which uses an IQC (Internal Quality Control) software certified by PepsiCo.
- This system uses a template with the most complete set of quality control functions in the industry, which systematizes measurements, report generation and recording of colour to maintain a centralized and profitable process.
- At LH Group we ensure quality colour service and colour matching on both a digital and conventional printing platform.
- We also have an in house certified colour management professional.

Ethical **TRADING**

- Requirement of doing business with multinational companies like Nestle, Unilever and Coca Cola.

The **leading supplier** of packaging solutions within the **Caribbean** and **South American** region
